Dear Mark,

Please find my brief report below:

Staff Nurses Saved Across Suffolk

Community Staff Nurses set to be saved under updated proposals for Suffolk's Healthy Child Service.

The recommendation,set to be considered by Suffolk County Council's Cabinet next week, comes after a major public consultation which received 1,928 responses and more than 1,500 detailed comments. The biggest concern raised by families, staff and partner organisations was the proposal to remove Community Staff Nurses from the Health Visiting Service.

Under the revised proposals, Community Staff Nurses would remain part of the future service, alongside an increased number of Health Visitors. Families with children under five would continue to receive all five universal health and development reviews. Health Visitors would carry out the first three reviews, strengthening specialist oversight and continuity during pregnancy and the earliest months of a child's life.

Great Waldingfield Finger Post Sign Restoration

I have requested my local highways engineer visit and return with a quotation to replace the signs at the Tentree Road/ Lavenham Road and Heath/ Folly Road intersections.

Both signs are bent, dirty and in a poor state, which is why I have set aside monies from my Local Highways Budget for this project.

Kind regards,

Philip
