Dear Sir/Madam,

Please find attached an ANPR data report for your parish.

This report breaks down the raw data by different speed thresholds and identifies what percentages of drivers photographed met the threshold for receiving a letter (35mph+). Furthermore, you can see tables showing the count of drivers by the day of the week, and by the time of day. I hope that these tables prove useful, especially if deploying your own SpeedWatch volunteers.

Please bear in mind that the camera photographs everyone travelling at 30mph or above, so the 'total photos' figure includes drivers that are driving within the limit. This also doesn't include drivers travelling under 30mph, so is not a true reflection of traffic counts; if you would like access to traffic count information you would need to commission a traffic survey.

If you have any questions, please feel free to contact me.

Kind regards,

Kaya

Kaja Wojcik
